Aviary multilevel system for healthy pullet rearing

Aviary Rearing System

Why Potters Aviary Rearing System is unique

- It is designed by farmers to be used by farmers
- Healthy and well trained pullets are a priority
- Easy bird management
- Open system making it better to see and manage the hens
- A simple support system with very little of the structure fixed to the floor – meaning easy cleaning
- Lighting available on all levels
- All necessary perching, feeding and drinking provided within the system
- Choice of belt numbers and levels
- Flexible system allows effective installation according to building dimensions

Two tier aviary system

Three tier aviary system
