# Hog Penning Equipment

## Divide W/Feeder

Hog Slat Inc offers a complete line of economical hog penning equipment. Penning features 1/8" x 1 1/2" top angle, solid 1/2" horizontal rods and beefy 3/4" solid rod bottom rail. 2" uprights are standard with 1 1/2" available on request. Available in standard height of 31 1/2" for nursery, wean/finishing and finishing applications. A 40" height is standard for gestation and breeding. A complete line of bolt-on-legs, post and other fasteners offer producers a true modular system that can be configured to any style of pen design.

Hog Slat panels are shot blasted before painting to remove rust, grease and scale. Powder epoxy paint is then electro-statically applied and baked on for a long lasting finish. Powder coat provides a superior protection to normal dipped or sprayed paint finishes used by other manufacturers.
